

Typical Generator Configuration Using Zero Surge Plug-in Surge Protection

5500 VA Generator
(120/240V 46/23A)

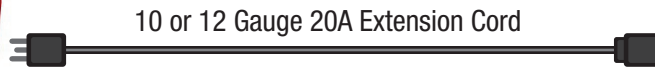

This set up can be repeated on other outlets on the generator.

Plug in up to
2 Protected Loads

5500 VA Generator
(120/240V 46/23A)

This set up can be repeated on other outlets on the generator.

Plug in up to
8 Protected Loads

Generator capacity varies by size and type so the Zero Surge plug-in protection model should be selected accordingly.
